WEB DEVELOPER

Implement Concrete Solutions for Complex Requirements | Enhance Client Satisfaction

Focused, creative, and conscientious developer within multiple platforms and methodologies. Possess natural calm, careful approach, and aptitude for problem solving challenging systems.

Demonstrate strong communication skills, work with cross-function teams, advise clients, and facilitate multiple projects simultaneously. Take practical approach and communicate with clarity. Work creatively, move plans forward, and support and encourage team members.

TECHNICAL SKILLS

Operating Systems	Windows, Macintosh (Mac OS)
Languages	HTML, CSS/SCSS, JavaScript, TypeScript
Middleware	Express.js
Libraries/Frameworks	jQuery, Bootstrap, React, React Native, Angular
Databases	SQL, MongoDB
Tools	Node.js
IDEs	Visual Studio Code, Atom, Eclipse

PROFESSIONAL EXPERIENCE

Project: myFlix - Anime

2022

Created a movie platform to give users access to information on selected movies, their directors, and genres.

- Researched current movie app models and user needs, determining primary project focus and enhancing user experience.
- Created two client-side apps, utilizing React and Angular.
- Retrieved movie information from self-made server-side API using MongoDB for its flexibility, compatibility with JavaScript and its dynamic schema.
- Successful in using class components and Flex design pattern with React and directives, data binding and interpolation with Angular to build responsive views.

Project: Let's Meet

2022

Developed world-wide meet app using AWS Lambda.

- Created serverless app, providing user access to various development meet-up events around the world.

- Streamlined user process, enabling filter events by location, focusing number of events shown at once to customize and tailor to user needs.
- Enhanced visual presentation, providing event data visualization using charts.js and fetching events using Google Calendar API with Google OAuth 2.0
- Successfully utilized test-driven development to build components of the app and service workers to serve an offline-compatible app.

Project: Chit Chat**2022**

Crafted a comprehensive mobile chat app using React Native, Expo, and GiftedChat.

- Allowed users to chat, take and send photos and share their location to provide a variety of options to the messages users can send to one another.
- Provided message loading and storage using Google Firestore database to handle real-time connections between the client and server and store messages and data for the application.
- Successfully used React Native to create a native mobile application and employed a virtual device to emulate the app.

EDUCATION

Full-Stack Web Development Certification

CareerFoundry, Berlin, GE

2022

Bachelor of Science (BSc), Human Biology

University of California, San Diego, CA

2019

Emergency Medical Technician (EMT) License

Pro-Tech Life Safety Services

2019

PROFESSIONAL DEVELOPMENT

- Basic Life Support (CPR and AED), American Heart Association, Anaheim, California

COMMUNITY INVOLVEMENT

Library Assistant, Jose Cisneros Cielo Vista Public Library, El Paso, Texas

Administrative Support, Jeong Ok Lee Pediatrics, Anaheim, California
